

DYMO® ID software with LinkWare™ Live integration!

FAQs

- What is the advantage of the DYMO-Fluke partnership?
 - Each link in a building infrastructure must have an identifier. This identifier is used for the link test and the label for the link. Now with the integration of LinkWare and DYMO ID, the identifier can be entered into LinkWare for testing the link and then imported into DYMO ID so the installer only has to enter the identifier one time, therefore saving the installer time as he tests and labels the network links.
- How does the Fluke Networks and DYMO integration work?
 - DYMO ID can now access the projects you set up on Fluke Networks LinkWare Live cloud-based service. Sign into your existing LinkWare Live account and define Cable IDs and test settings. Use DYMO ID software to import the Cable IDs for your projects and easily print labels for patch panels, wires & cables.
- How much does it cost?
 - Both DYMO ID and LinkWare Live are available for free. DYMO ID is available for download on dymo.com. LinkWare Live is available at www.linkwarelive.com.
- How do I download the DYMO ID software?
 - DYMO ID can be downloaded from dymo.com.
 - To install the software
 1. Download the latest version of DYMO ID™ software from the DYMO Web site at support.dymo.com.
 2. Follow the instructions in the installer.
 - DYMO ID is PC compatible with Windows® 7, Windows® 8/8.1, Windows® 10
- What Fluke products work with LinkWare Live?
 - LinkWare Live works with Versiv™ Cable Certification Family
- What DYMO products does DYMO ID work with?
 - DYMO ID is compatible with XTL 300, XTL 500 and LabelWriter 4XL label printers. DYMO ID can also be used with a laser printer using the available XTL Sheet Labels.
- What types of labels can I print with DYMO XTL printers?
 - The following labels are available for applications such as Patch Panels, Wires & Cables and more.
 - Laminated wire/cable wraps, heat shrink tubes, flexible cable wraps, indoor/outdoor vinyl, sheet labels.

- I already have DYMO ID, how do I get the new Fluke functionality?
 - If you are connected to the internet, DYMO ID will notify you if there is a newer version available and you will be able to update within the application. You can also check for updates from the DYMO ID menu > About.
- What countries or regions are supported?
