BUGS-B-GONE® Helpful Hints and Cleaning Tips

How does it work? BUGS-B-GONE® is specifically formulated to chemically bond with the acid in bug remains, softening and loosening them. After BUGS-B-GONE® soaks in, water further activates it, allowing you to easily wipe or wash bugs away. For best results, be sure to use a wet cloth, wet squeegee, garden hose, or pressure washer to clean surfaces.

BUGS-B-GONE® works best on cool and dry surfaces. Surfaces to be cleaned should be cool to the touch or be cooled with cold water and dried prior to treatment. Apply liberally to area to be cleaned. Soak for 45 to 60 seconds. IMPORTANT: WATER ACTIVATED - wash off with wet cloth, squeegee or pressure washer before BUGS-B-GONE® dries. If BUGS-B-GONE® is accidentally let to dry on paint surfaces, on rare occasions a residue similar to watermarks may occur. This is easily removed with a good polishing compound or cleaning wax.

BUGS-B-GONE® is safe to use on all surfaces when used as directed.

Use BUGS-B-GONE® often. The more you use it, the easier the bugs come off. Each use leaves a residual effect, making it harder for bugs to stick and easier to remove them.

Try it on both sides of your windshield. Unlike ordinary windshield washer fluids, BUGS-B-GONE® leaves the outside of your windshield crystal clear without hazy bug smears. In addition, BUGS-B-GONE® is effective at removing the annoying haze which can form on the inside of windshields. It also easily cleans cigarette smoke from dashboards and windows.

When cleaning chrome, a light haze may appear upon drying. Because chrome is a very porous finish, grime and gunk fill the pores. BUGS-B-GONE® not only cleans chrome surfaces, it gets deep into the pores. Even after bugs are wiped away, BUGS-B-GONE® continues cleaning. If residue from the pores leaves a light haze on the surface, simply buff lightly with a soft, dry cloth and watch the sparkling shine emerge.

BUGS-B-GONE® makes an excellent wash, especially for cars, recreational vehicles and trucks. Spray entire vehicle and use a pressure washer to finish cleaning.

Don't let those ugly splats bug you anymore! Water activated BUGS-B-GONE® is the best bug remover and vehicle cleaner you will ever find. Try it today.

PART NO. BBG2

BBG-2, TRIAL SIZE

Try out our BUGS-B-GONE® product in this convenient 2 oz. size. Then you'll see just how effective this product is at getting rid of those ugly bug splats.

PART NO. BBG4
