Proper selection of the products listed for sale in this catalog is essential to minimize the risk of any seal, bearing or other product failure. Such failures can result in property damage or severe personal injury to operators of machinery, vehicles or to others. You must carefully evaluate the particular application on or into which you intend to install the products. Products in this catalog require installation by an experienced professional mechanic or qualified maintenance professional.

The product properties and operating parameters described in this catalogue are based upon tests conducted by SKF or reported by others. SKF does not assume any responsibility for errors in the data published in this catalog. The life and performance of the products ultimately depend on a number of factors. These include, for example, selection of product design type, selection of materials for their different properties, handling and installation, operating conditions, including shaft surface or bore conditions, the quantity, quality and chemistry of lubricants and other factors. Severe environments can adversely affect product life or performance. For help in realizing longer SKF product life, and optimal performance for your specific application, contact SKF's Customer Services Department at 1-800-808-NAPA.
