

Power Steering Products - Benefits & Features

Steering Pump Filters

1

Feature:

Pumps with Integrated redundant filtration system, which includes a standard mesh filter to remove non-metallic particulate, as well as a magnetic filter to remove ferrous particles.

Benefit:

Contaminates removed from fluid that can cause premature steering system failure and result in costly repairs.

2

Feature:

All filters feature powerful magnet.

Benefit:

Removes 99% of contaminants at filter entry point.

3

Feature:

Integrated and independent filters supplied with built-in fluid safety bypass.

Benefit:

Ensures power steering continues to operate in event of filter overload.

4

Feature:

All filters have secondary membrane filter.

Benefit:

Captures non-ferrous materials that may contaminate the power steering system.

5

Feature:

Independent filters in 3/8" and 1/2" size.

Benefit:

Fits all makes and models & allows for fit in small places and at all angles.
