

Introducing LF12K

Need a **LOUD** Flasher?

LF12K

Did you know that a replacement 2 pin flasher is available when a LOUD flasher is required? The NAPA LF12K is a kit with a variable load flasher, bracket and harness. It provides an option to replace some 2 pin and 3 pin type flashers and offers several advantages.

LF12K Features & Benefits:

- Louder than standard flashers
- Ideal for RV's, Heavy Duty applications and trailer towing
- Services from 1 to 12 lamps
- Kit includes LF12 loud flasher, bracket and harness
- Bracket and harness enable remote installation when loud flasher sound is needed
- LF12 can be used in various 2 pin and 3 pin applications

FYI

LF12

LF12 is also available without bracket and wire harness, as it will fit directly into the fuse block on some applications.
