

**Tru-Flow™
Water Pumps**

PowerClean™ Flush Tool

Part No. 91002

Reduce Warranty Claims – Increase Customer Satisfaction

The NAPA Tru-Flow PowerClean Flush Tool cleans engine cooling systems completely and thoroughly.

Cooling systems can be difficult to flush completely due to accumulated debris from parts erosion, system neglect, incorrect or non-compatible coolants, and other problems. Inadequate flushing can ruin a newly installed water pump and result in warranty problems and frustrated customers. Make sure you perform a complete cooling system flush by using the NAPA Tru-Flow PowerClean Flush Tool with patented pulsing technology.

Install confidence. Install NAPA.

NAPA Tru-Flow PowerClean Flush Tool Kit Includes:

- Pulsating Gun Assembly with Pre-set Regulator
- Water Line Backflow Preventer
- Large Rubber Tip for Radiator Necks and Direct Flushing of the Engine Block
- Small Rubber Tip on Whip Hose for Direct Access to Heater Core Tube Stubs
- 5/8" and 3/4" Heater Hose Barbs for Flushing Heater Cores or Engine Blocks
- Durable Protective Storage Case with Room for Additional Items

Patented Pulsating Technology Ensures a Super Clean Cooling System

Using clean water and compressed air, the NAPA Tru-Flow PowerClean Flush Tool (Part No. 91002) “water hammers” accumulated sludge and scale deposits without the use of harsh chemicals or solvents. It cleans radiators, heat exchangers, hoses and engine blocks more effectively than conventional flushes, maintains system integrity and ensures warranty coverage on replacement parts, including water pumps.

The PowerClean Flush Tool’s patented process uses fixed dimensional control of the air and liquid flow paths. The process allows air to pressurize the cleaning fluid to scrub deep into corners and crevices, eliminating trapped debris. While the “pulse” is intensified with some limited backpressure, the pressure is immediately regulated to a safe level if a hard blockage exists eliminating the possibility of heater core damage from excessive system pressure.
