Inhalation: Remove from exposure. If irritation develops, get medical attention.

Ingestion: Rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconscious or convulsing person. Get medical attention.

Most important symptoms/effects, acute and delayed: Cause severe eye irritation or burns. Permanent damage may occur. May cause skin irritation. Inhalation of mists may cause mucous membrane and respiratory tract irritation. Swallowing may cause irritation to the mouth, throat and digestive tract.

Indication of immediate medical attention and special treatment, if necessary: Immediate medical attention is required if eye contact occurs.

Section 5. FIRE-FIGHTING MEASURES

Extinguishing Media: Use media that is appropriate for the surrounding fire.

Specific hazards arising from the chemical: This product contains more than 70% water and is not flammable or combustible. Dried product (after the water has evaporated) is classified as an oxidizer. Contact of dried residue with flammable or combustible material including clothing may cause fire. Dust clouds from dried product may be explosive. Combustion may produce oxides of carbon, nitrogen, molybdenum and sodium.

Safety Data Sheet

Special protective equipment and precautions for fire-fighters: Firefighters should wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire exposed containers and structures with water.

Section 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures: Use appropriate protective clothing and equipment during clean-up.

Environmental hazards: Avoid release into the environment. Report spill as required by local and federal regulations.

Methods and materials for containment and cleaning up: Absorb spills with an inert absorbent and place in a container for disposal. Do NOT use sawdust, rags or any other combustible material. Combustible absorbents may catch fire as they dry in contact with this product. Contain large spills with sand or earth. Pump liquid into holding tanks. Collect residue with an inert absorbent and place into a container for disposal.

Section 7. HANDLING AND STORAGE

Precautions for safe handling: Avoid contact with eyes, skin or clothing. Avoid generating and breathing mists. Use with adequate ventilation. Keep product away from heat and all flammable or combustible materials including paper, solvents, fuels, wooden floors and clothing. Wash thoroughly after handling. Remove and launder contaminated clothing before reuse. DO NOT allow product to dry on clothing.

Conditions for safe storage, including any incompatibilities: Store in a cool, dry, well-ventilated area away from combustible materials and acids.

Section 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure guidelines:

Sodium Nitrite	None Established
Potassium Phosphate	None Established
Sodium Molybdate (as soluble Mo)	0.5 mg/m ³ respirable TWA ACGIH TLV 5 mg/m ³ TWA OSHA PEL
Dipotassium Sebacate	None Established
Sodium Tolytriazole	5 mg/m ³ TWA skin AIHA WEEL

Appropriate engineering controls: Use with adequate general or local exhaust ventilation to maintain exposure concentrations below the occupational exposure limits.

Personal Protective Equipment

Respiratory protection: For operations where exposure limits are exceeded, a NIOSH approved respirator should be used. Respirator selection and use should be based on contaminant type, form and concentration. Follow OSHA 1910.134 and good Industrial Hygiene practice.

Skin protection: Wear impervious gloves such as rubber to avoid skin contact.

Eye protection: Chemical safety goggles are recommended to avoid eye contact.
