

Molded Coolant Hose Product Features

NAPA Belts/Hoses molded coolant hose is manufactured to fit specific applications. Equivalent in design to OEM specifications.

- Recommended for upper, lower, by-pass, heater and other coolant hose applications.
- Heat and ozone resistant cover.
- Engineered to resist electrochemical degradation - the leading cause of hose failure.
- Re-engineered materials resist vacuum collapse.
- Meets SAE 20R4 and 20R3 Type EC Class D-1 and D-2 specifications.
- Temperature rating: -40° F to 275° F (-40° C to 135° C) in coolant hose applications.
- NAPA Belts/Hoses recommends replacing standard worm drive and spring loaded clamps with NAPA Belts/Hoses PowerGrip® Clamps each time a new coolant hose is installed.
