Eye: Lubricating oils are generally considered no more than minimally irritating to the eyes. May cause slight irritation of the eyes.

Skin: Minimal hazard in normal industrial use. May cause gastrointestinal discomfort.

Ingestion: Although this product has a low order of acute oral toxicity, aspiration of minute amounts into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possibly death.

Inhalation: Inhalation of vapors (generated at high temperatures only) or oil mist may cause mild irritation of the nose, throat, and respiratory tract.

Systemic (Other Target Organ) Effects: No medical conditions affected by exposure.

Cancer Information: Not a carcinogen according to NTP, IARC, or OSHA.

Reproductive Effects: No data available to indicate product or any components present at greater than 0.1% may cause birth defects.

CHRONIC, PROLONGED OR REPEATED EXPOSURE

Effects of Repeated Overexposure: Upon prolonged and/or repeated exposure, no hazard in normal industrial use.

Other Effects of Overexposure: No information available.

4. FIRST AID MEASURES

Ensure physician has access to this MSDS.

TREATMENT

Eyes: Flush with water. If irritation occurs, get medical attention. Rest eyes for 30 minutes. If redness, burning, blurred vision, or swelling occurs, transport to nearest medical facility for additional treatment.

Skin: Remove contaminated clothing and shoes and wipe excess from skin. Flush skin with water then wash with soap and water. If irritation occurs, get medical attention. Do not reuse clothing until cleaned. If redness, swelling, pain, and/or blisters occur, transport to the nearest medical facility for additional treatment.

Inhalation: Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately.

Ingestion: Minimal risk of harm if swallowed. Do not induce vomiting. Seek medical attention immediately. Provide medical care provider with this MSDS.

Notes to Physician: Aspiration during swallowing or vomiting may severely damage the lungs.

5. FIRE FIGHTING MEASURES

Flammable Properties:

Flash Point: 208 °C (406 °F)

Flash Point Method: Cleveland Open Cup

Auto-ignition Temperature: No data

Flammability Limits: Percentage of vapor concentration at which product can ignite in presence of spark:

Upper Flammability Limit: Unknown

Lower Flammability Limit: Unknown

Hazardous Combustion Products: Carbon dioxide, Carbon monoxide

Extinguishing Media: Use alcohol resistant foam, carbon dioxide, or dry chemical when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the surface of the fire. Do not direct a stream of water into the hot burning liquid.

Fire Fighting Instructions: Material may be ignited only if preheated to temperatures above the high flash point, for example in a fire.

Protective Equipment for Fire Fighters: Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Use methods for the surrounding fire.

6. ACCIDENTAL RELEASE MEASURES

Protect People: No health affects expected from the clean up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section 8 of this MSDS.

Protect the Environment: Do not flush to sewer.

Cleanup: Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section 8 at a minimum. Dike with suitable absorbent material like granulated clay. Gather and store in a sealed container pending a waste disposal evaluation.

7. HANDLING AND STORAGE

Steps to be Taken in Case Material is Released or Spilled: See Section 6.

Other Precautions: Store in a cool dry ventilated location. Isolate from incompatible materials and conditions. Keep container(s) closed. Do not expose to extreme temperatures or flames. Mildly irritating material. Avoid unnecessary exposure.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Respiratory Protection: No respiratory protection required under normal conditions of use.

Escape: None required where adequate ventilation is provided. If airborne concentrations are above the applicable exposure limits, use NIOSH/MSHA approved respiratory protection.

Skin Protection: Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Neoprene gloves are recommended.

Eye Protection: Wear safety glasses when handling this product if there is a likelihood of contact with eyes.

Engineering Controls: No exposure limits exist for the constituents of this product. No engineering controls are likely to be required to maintain operator comfort under normal conditions of use.
