

**DIGITAL DISPLAY**  
LED indicators and easy-to-use touch-pad controls to select your rates, which include Charging, Boost and Engine Start

**TWO-HOUR TIMER**  
with "HOLD" position for continuous charging

## Features

- **FULLY AUTOMATIC** – multi-stage charging automatically adjusts amperage rate for faster charging, added precision, safety and extended battery life.
- **COMPUTER CONTROLLED TECHNOLOGY** – protects sensitive vehicle electronics.
- **REVERSE HOOK-UP DETECTION** – charger will not operate if clamps are connected in reverse on battery terminals. LED indicator will flash.
- **ECO FRIENDLY/ENERGY EFFICIENT** – meets the highest industry standards for energy efficiency. When the battery is fully charged the charger will enter maintain mode, periodically check battery status and adjust charge rate for optimum efficient energy usage.
- **TIMER-CONTROLLED OR CONTINUOUS OPERATION** – for charging versatility.
- **PROFESSIONAL GRADE DESIGN AND CONSTRUCTION** – built to last.

**Designed To Safely Charge**
