

Royal Purple Two Cycle Motor Oil

2-Cycle TCW III

Royal Purple's 2-Cycle TCW III is a high performance engine oil that improves performance and dramatically reduces wear in two-cycle gasoline engines. It's recommended for use in both pre-mixed and oil injected gasoline two-cycle engines in outboard motors, motorcycles, jet skis, chain saws, etc.

2-Cycle TCW III increases horsepower and reduces fuel consumption, heat, wear and emissions. Its synthetic solvency keeps spark plugs and exhaust ports clean. Its performance advantages come from a blend of synthetic oils plus Royal Purple's proprietary Synerlec technology. Synerlec significantly increases oil film strength for optimum engine efficiency and maximum protection.

2-Cycle TCW III is suitable for premix in snowmobiles but due to cold soak (low temperature pumpability issues on oil injected snowmobiles) Royal Purple Snow 2-C is recommended for operation in temperatures below 20° F.

<u>Package size</u>	<u>Part number</u>
Quart bottle	01311
12 quart case	12311
Gallon bottle	04311
4 gallon case	44311
5 gallon pail	05311
55 gallon drum	55311
