

Batteries

NAPA DEEP CYCLE COMMERCIAL and SPECIAL PURPOSE

GROUPS 31, 4D and 8D

- Engineered to handle the demanding requirements of heavy duty vehicles and off road equipment
- Extra thick plates are anchor-bonded to the internal container for maximum vibration resistance (8213, 8274, 8276)
- Super tough separators design virtually eliminates the possibility of internal shorts, even under the roughest conditions
- Through partition welds reduce electrical resistance with reduce electrical resistance with shorter current paths to deliver more usable power
- Special application 8-volt commercial and marine batteries (8201, 8208, 8210) also available
