

Gold Stripe PowerBand® Belts

Designed for problem (constant vibration), heavy-duty, applications requiring belt sets. Tie-band feature joining belts together ensures stability lacking in ordinary belt sets.

- Joined belts rotate at same rate of speed, providing better shock load absorption.
- Belt can't turn over or slip off drive.
- Unique tensile cord design gives belt extra strength, added flexibility and shock-load resistance.
- Molded notches reduce bending stress, especially on small diameter pulleys. Also helps dissipate heat.
