

Flex-Form® Coolant Hose

Flex-Form Coolant Hose reduces inventory, expands coverage and increases return on investment.

New design allows customer to shape hose to fit most curved hose applications and easily installs with worm-drive clamps.

Available in popular radiator hose sizes, including dual diameters.

Constructed with heat and ozone resistant materials throughout to maximize service life. Similar to SAE 20R5 Class D2.

Temperature Range: -40°F (-40°C) to +257°F (+125°C).
