

Transmission Oil Cooler Hose

Recommended for replacing original transmission oil cooler lines or when installing an aftermarket add-on kit. In addition it can be used for hydraulic oil lines, antifreeze compounds or water. Meets or exceeds SAE J1019 requirements.

Cover: Black, oil and abrasion resistant, neoprene rubber.

Reinforcement: 1 high tensile textile braid

Tube: Black, nitrile. Excellent oil and heat resistance.

Temperature Range: -40°F (-40°C) to +275°F (+135°C) constant and +300°F (+149°C) intermittent up to 10% of operating time. Water to 225°F (107°C) for pressure lines and +180°F (+82°C) for return lines.
