

BATTERIES

75 MONTH THE LEGEND™ PROFESSIONAL LINE

- Advanced design includes a silver alloy and special plate paste to handle the demands of high under-hood temperatures and severe service conditions while providing premium power.
- Heavier grid and plate design provides longest life with twice the wire diameter of typical grids.
- Special negative envelope separators reduces short circuits due to normal plate shedding and growth protecting all sides of the plate.
- Legendary starting power with dependable performance.
- Utilizes advanced engineering and computer-aided manufacturing in providing a flush cover design that allows the battery to fit into the vehicle with no hold-down or vent cap interference.
- Plenty of reserve capacity for accessories, computers, and emergency needs.
- Flush cover design eliminates the danger of harmful acid spills and loose vent plugs to keep battery top dry and corrosion-free. Safety vents are flame-retardant for added user protection.
- Calcium-calcium alloy provides minimal water loss and very little gassing ensuring a truly maintenance-free battery with plenty of starting power. Silver alloy additive resists internal corrosion extending battery life.
- Full-frame power path grids avoid sharp wires poking through separators and directs the power straight to the lug for low resistance, higher cranking amps, and maximum starting power every time.
- Forged terminals & bushings are very solid preventing porosity, corrosion, black post, and harmful acid leaks.
- Pure demineralized electrolyte with no contaminants ensures true maintenance-free performance for reduced water loss, gassing, and long battery life.
- High-impact polypropylene cover is heat sealed to the case under extreme pressure. This helps prevent electrolyte leakage, improves reliability, and reduces breakage. Convenient carrying handle provides ease of transport and installation.
- Over 250 quality control checks ensure long life, maximum performance, and a battery you can trust.
