

B A T T E R I E S

MARINE/RV DEEP CYCLE

- *Ideal for heavy-duty cycling applications with long, deep discharges and long, slow recharges. (Can also be used for starting.)*
- *High-density plate paste delivers more power and lives longer.*
- *Vibration resistant design handles demanding marine use.*
- *Special fiberglass plate wrap reinforces plates against shedding.*
- *Stainless steel terminals for ease of installation and corrosion-free connections.*
- *Convenient carrying handle for ease of transportation.*
- *Full-frame grids enhance efficiency of current flow and resist vibration damage for trouble-free service. There are no sharp grid wires to cause shorts.*
- *Exclusive, deep-pocket envelope separators virtually eliminate shorting, improve reliability and extend service life. Narrow ribs reduce separator "corrode thru."*
- *Specially formulated electrolyte uses demineralized water for significantly reduced water loss and gassing.*
- *Straight-through-the-partition cell connectors shorten current path while increasing power delivering more power-per-pound.*
- *Over 250 quality control checks ensure long life, maximum performance, and a battery you can trust.*
