

V-Ribbed Belts

Replace the original belts on serpentine drives and other V-Ribbed belt applications with NAPA V-Ribbed belts. Designed for small diameter pulleys, backside idlers, and for use with (or without) automatic tensioners.

- Special belt constructions eliminate belt noise, reduce tension loss and solve problem drive applications.
- Specially constructed to resist wear and cracking.
- Special tensile members and fiber-loaded reinforcement of ribs for added wear and crack resistance.
- Meets or exceeds SAE J1459 specifications.
