

SD503 & SD504 SOLENOIDS

Feature:

- 100% New tested for pull and hold performance, voltage drop, and over travel

Benefit:

- Insures positive engagement and electrical contact for sure starts.

Feature:

- High temp Cap

Benefit:

- Provides resistance to warping and cracking under extreme conditions to ensure positive starts.

Feature:

- Solid copper stationary contact studs

Benefit:

- Provide excellent electrical contact and long life.

Feature:

- Cadmium plated contact disc

Benefit:

- Helps prevent sticking during high current conditions for continuous starts.

Feature:

- Machine-wound copper coils with same number of turns as OE

Benefit:

- Provides strong magnetic field for consistent plunger operation and sure starts.
