

Protestant pastor views of Islam

Methodology

- ❑ LifeWay Research commissioned Zogby International to conduct a telephone survey of Protestant pastors. It was conducted March 1-9, 2010.
- ❑ The calling list was randomly drawn from a list of all Protestant churches.
- ❑ Each interview was conducted with the senior pastor, minister or priest of the church called.
- ❑ Responses were weighted to reflect the geographic distribution of Protestant churches.

Methodology continued

Zogby International surveys employ sampling strategies in which selection probabilities are proportional to population size within area codes and exchanges. Up to six calls are made to reach a sampled phone number. Cooperation rates are calculated using one of AAPOR's approved methodologies¹ and are comparable to other professional public-opinion surveys conducted using similar sampling strategies.²

¹See COOP4 (p.38) in *Standard Definitions: Final Dispositions of Case Codes and Outcome Rates of Surveys*. The American Association for Public Opinion Research, (2000).

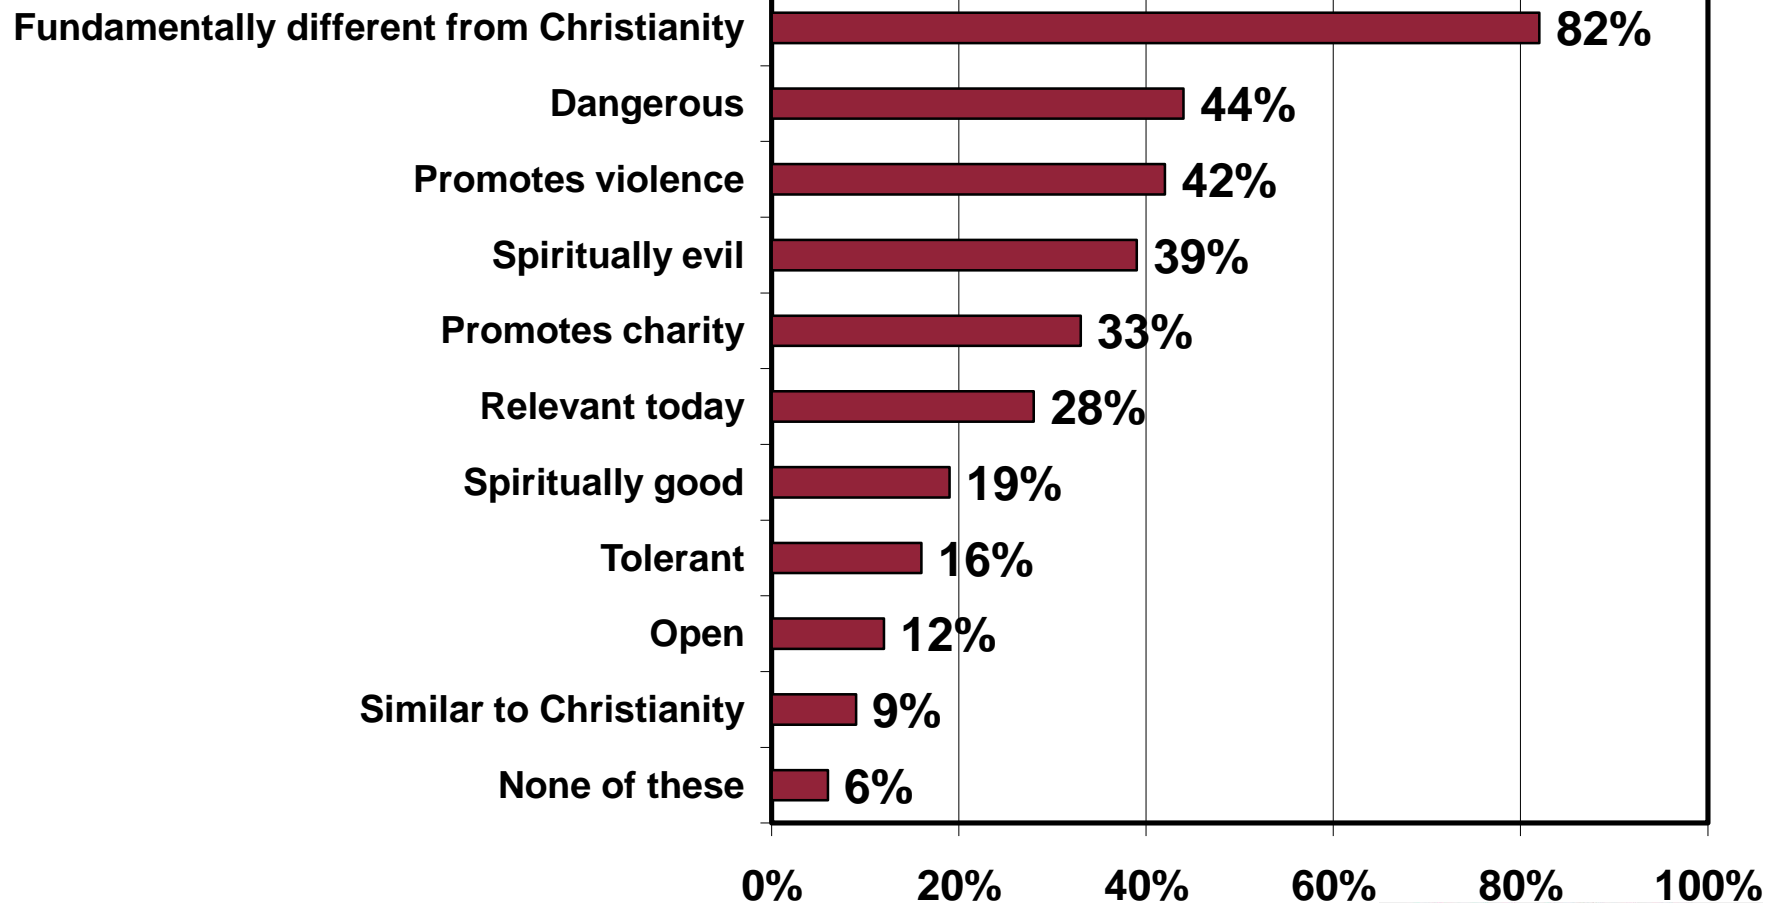

²*Cooperation Tracking Study: April 2003 Update*, Jane M. Sheppard and Shelly Haas. The Council for Marketing & Opinion Research (CMOR). Cincinnati, Ohio (2003).

Methodology continued

- ❑ The completed sample of 1,000 phone interviews provides 95% confidence that the sampling error does not exceed $\pm 3.2\%$.
- ❑ Margins of error are higher in sub-groups.
