

## SAIL THROUGH CLEAN UP

### To remove excess ice from the Ice Hopper:

Hold the Blend Only/Shave Only switch in the Shave Only position until the hopper is empty.

### For quick cleaning of the Drink Chamber, Remix Channel and Drink Dispensing Area:

1. Fill the Drink Chamber about halfway (32 oz. / 1 L) with warm, soapy water.
  2. Hold the Blend Only / Shave Only switch in the Blend position for about 20 seconds.
  3. Dispense the soapy water out through the Drink Dispenser Spout (but don't drink it!).
  4. Repeat the process with clean water two more times to remove any soap residue.
  5. Now you're ready to make a new batch of Frozen Concoctions!
- It's not quiet but fast and easy, but for full cleaning and maintenance, see User Manual.

Pineapple Juice	16	473	8	236
Fresh Strawberries	2 3/4 C	651	1 1/2	325

**BALI**™  
Frozen Concoction Maker®

Quick Start Guide

# TO MAKE FROZEN CONCOCTIONS

Refer to User Manual for important safety and cleaning instructions

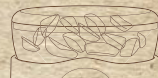

We've made it easier than ever to prepare the perfect frozen concoctions for your next party, or for an easy, breezy afternoon spent lounging in your hammock. Just follow these four steps and you'll be setting sail to Margaritaville in no time!

For the best experience, wash before using.

## 1. ADD ICE

Remove the Ice Reservoir Lid by turning it counterclockwise to the UNLOCKED position.

Fill the Reservoir with ice cubes, then replace the lid and turn it clockwise until it reaches the LOCKED position.

## 2. ADD INGREDIENTS

Move the Ice Chute to the side and pour your ingredients into the Drink Chamber's top opening. Move the Ice Chute back to center until it locks in place (see reverse side for a yummy recipe to get you started).

## 3. MAKE YOUR SELECTIONS

Select the type of drink you want to make by turning the Drink Selector Dial (the top dial) to either Ritas, Daiquiris, Coladas or Smoothies (see below). Select the drink amount by turning the Drink Level Dial (the middle dial) to either Half Chamber (about 33 oz. / 1 L) or Full Chamber (about 60 oz. / 2 L).

Ritas = Liquid ingredients only

Daiquiris = Liquid ingredients + frozen fruit

Coladas = Liquid ingredients only

Smoothies = Liquid ingredients + fresh fruit

## 4. START IT UP

To start the Automatic Shave & Blend Cycle, simply push the Start/Stop Button. BALI™ will automatically shave ice to the perfect consistency based on the amount of drinks you are making and the type of drink you selected.

Green = Ready To Go!

If you're feeling creative, you can use the Manual Shave & Blend feature to customize your drink to your liking.

### NOTE:

If Start/Stop Button is blinking Red, check all moveable parts are locked in place.

Most Common Fixes: Check the Ice Chute and the Ice Reservoir Lid are locked in place.

# TO SERVE

Woohoo! The hard work is done (if you can even call that "hard work"). Now it's time to enjoy the fruits of BALI™'s labor.

To serve, simply press your glass or cup against the lever below the Drink Dispenser Spout and hold it there until you have the amount you want.

When you press your glass against the lever, the Remix Channel will spiral into action like a whirlpool, mixing your frozen goodness to perfection. This is normal operation and nothing to be alarmed about. Drinks will only be dispensed when you press the lever underneath the Drink Dispenser Spout.

NOTE: We don't recommend dispensing Frozen Concoctions directly into your mouth, but it's your machine now, so anything goes! (Just don't say we didn't warn you about the whole "brain freeze" thing.)
