WE HAVE THE PRESCRIPTION

The **NEW** MSA Fas-Trac® III Suspension

Ensuring compliance with head protection regulations can be a headache for safety managers. Uncomfortable, sweaty, poorly fitting helmets only make it harder. MSA's new Fas-Trac III Suspension fits MSA's industrial helmets, making the industry-leading safety helmets the most comfortable as well. And when helmets feel good, it's a lot easier to get workers to wear them!

WEARER PAIN POINTS ADDRESSED BY THE FAS-TRAC® III SUSPENSION

COMFORT FEATURES

- Sweatband is perforated to allow air flow and sewn on to keep it in place.
- Largest sweatband on the market provides nearly 30% more coverage than competitor models.
- Strong, adjustable webbing provides a comfortable fit.
- Rear lug attachments are nearly flush with headband to reduce pressure points and compression headaches.
- Optional sweat-wicking accessory helps keep forehead cool and dry, and installs while the suspension is in the helmet.

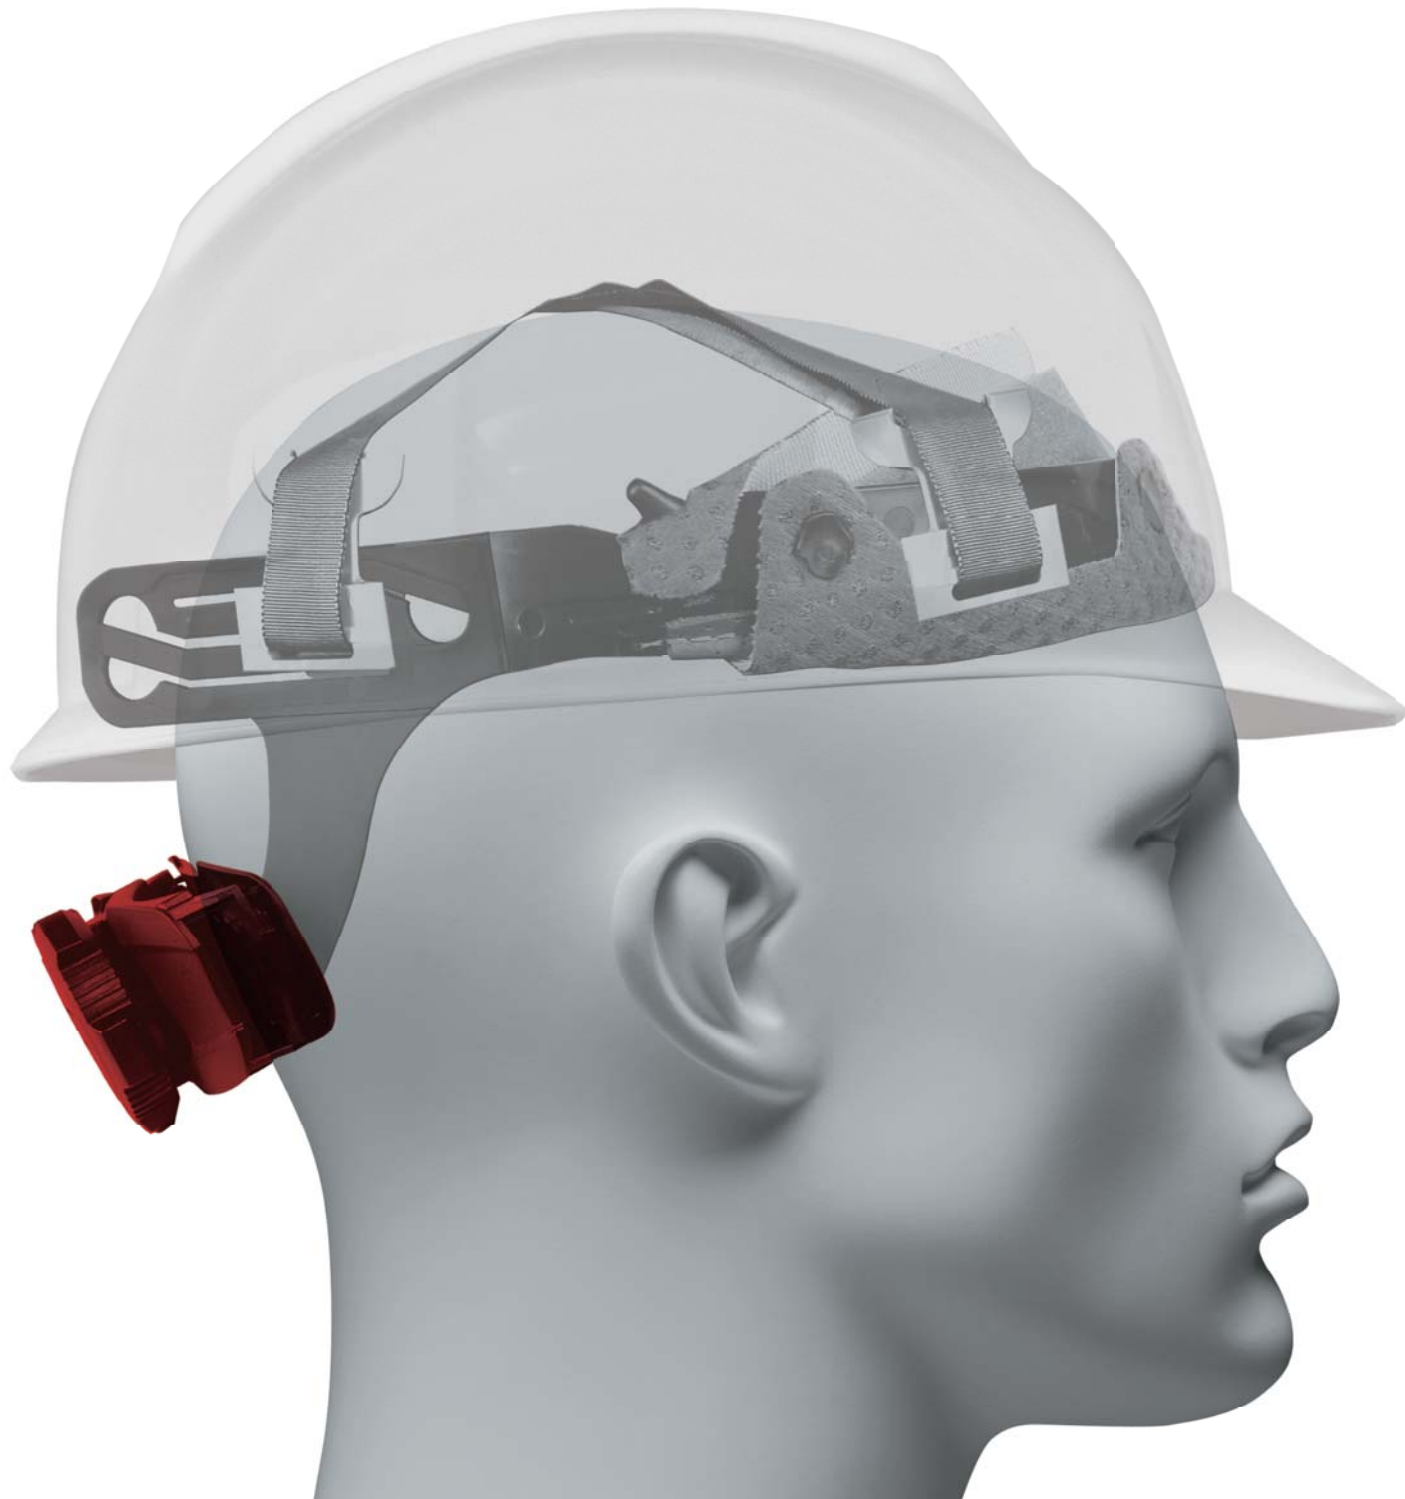

NAPE STRAP FEATURES

- Three nape strap levels easily adjust to high, medium or low — wherever it's most comfortable.
- The nape strap extends lower to cradle the back of the head, giving the wearer better helmet balance, more stability and improved retention — even when bending over!
- The Fas-Trac® III Suspension has no metal parts.

RATCHET FEATURES

- Ratchet rotates smoothly and precisely to provide a snug, comfortable fit.
- Once adjusted, the ratchet holds securely and won't loosen, improving helmet retention.
- A bigger knob and grooved finger holds make it easy to grasp — even with work gloves on!
- The ratchet comfort pad contours to the back of the head to improve airflow and prevent hair-pulling.
