Vented Industrial Safety Helmets

Comfort and protection with identification function

MSA Suspensions - General features and benefits

- Overhead straps made of woven polyester providing high comfort and long term, consistent shock absorption performance
- Ensures consistent performance and comfort level even under the influence of moisture or low temperatures
- Sophisticated 4 point attachment: good positioning, stability and better air circulation
- Ideal positioning of the harness through height and length adjustment: perfect for use with face masks
- Self-adjusting textile crown straps for fast height adjustment and comfortable fit

MSA Push-Key suspension Features and benefits

• EASE OF USE:

- This is the fastest sliding suspension on the market: simple push to loosen, squeeze to tighten
- Can be adjusted with one hand even when worn

• SURE FITTING:

 It offers greater retention capacity than competitive sliding suspensions because it's so much easier to select the best adjustment position

• ADJUSTABILITY:

- 2 levels of nape adjustment for fitting comfort
- Designed to avoid interference with other PPE such as ear muffs

• SWEATBAND COMFORT:

 2 different options: sewn in PVC perforated wipeable or sweatwicking foam

MSA Fas-Trac® III suspension Features and benefits

• BALANCE & STABILITY :

- Lower nape strap improves retention: Helmets stay on when leaning over
- Adjusts for a custom fit to the back of the head

• HEADBAND COMFORT:

- The comfort pad by separating the ratchet from the head, cradles the head increasing comfort and cooling airflow
- Prevents hair from getting pulled

• EASE OF USE:

- Ratchet offers smooth rotation: reduced effort to turn
- Easy grip knob adjustable even with gloves on

• ADJUSTABILITY:

- Three levels of nape height adjustment giving superior nape fit
- Avoids interference with other PPE such as ear muffs

• SWEATBAND COMFORT:

- Largest sweatband surface area on the market covers more of the headband and user's forehead for increased comfort
- 2 different sweatband options: sewn in PVC perforated wipeable or sweat-wicking washable foam (breathable fabric allows direct air permeation)

 Replaceable foam sweatband can be attached over the existing sweatband without demounting the suspension

Also available Terry cotton washable sweatband that can be used over both sewn in PVC or replaceable foam sweatbands for increased user comfort

Lifetime guidelines			
Storage time (when helmet not used)	3 years from shell injection date (helmet packed in proper condition, not exposed to light, chemical or any type of pollution). Store in a proper storage bag and/or in a closed cabinet to avoid extended exposure to sunlight, cold, humidity, exhaust fumes, etc. If the helmet has been stored more than 3 years, deduct the extra storage time from the recommended helmet's service life. NB: For EN 50365 class 0 helmets recommended storage temperature 20 \pm 15 °C to ensure performance		
Service life (in addition to the storage time)	5 years from actual starting date of use. MSA recommends writing the date of first use onto a sticker (supplied with each helmet) and then sticking into the shell. This is normally the point at which service life starts		
Suspension (Push-Key and Fas-Trac III)	Replace when damaged or contaminated , or as required for hygienic reasons
