### Lifetime guidelines

| Storage time (when helmet not used) | 2 years from shell injection date (helmet packed in proper condition, not exposed to light, chemical or any type of pollution). Store in a proper storage bag and/or in a closed cabinet to avoid extended exposure to sunlight, cold, humidity, exhaust fumes, etc. If the helmet has been stored more than 2 years, deduct the extra storage time from the recommended helmet’s service life. NB: For EN 50365 class 0 helmets recommended storage temperature 20 ±15 °C to ensure performance |
| Service life (in addition to the storage time) | 4 years from actual starting date of use. MSA recommends writing the date of first use onto a sticker (supplied with each helmet) and then sticking into the shell. This is normally the point at which service life starts |
| Suspension (Push-Key and Fas-Trac® III) | Replace when damaged or contaminated, or as required for hygienic reasons |
