

# HVAC Applications for the MSA TRIGARD Monitoring System

## Key Features of the TRIGARD Monitoring System

- Adjustable sensor range
- Multiple sensor mounting options
- AC- or DC-powered
- On-board relays
- Piezo horn with horn silence button
- NEMA 4X design
- Simple push-button calibration
- Available as a single-point or 3-point unit
- Optional battery backup

## Application

The HVAC industry possesses a wide variety of gas detection needs. From boiler rooms, battery rooms, engineering and research labs, and transportation maintenance facilities, to a myriad of other industrial building and facility applications, each environment has its own monitoring needs. To enable personnel to work safely in these environments, monitoring of toxic gases, oxygen enrichment and deficiency, and combustible gases is necessary. Due to this wide variety, a flexible, versatile gas monitor is absolutely essential.

## Solution

With abundant sensor offerings and a variety of configurations, the MSA TRIGARD Monitoring System is an ideal, yet affordable, solution.

*Because every life has a **purpose...***

## Additional Features

- Operates in diffusion mode, with factory-calibrated sensors ready to perform immediately after installation
- Available for remote sensing applications, where installation requires the sensor to be separated from the electronics
- Can operate on a completely stand-alone basis with its large LCD display, optional quick-check LEDs and four relay outputs (three alarm and one fault), or can be connected with a 4-20 mA or MODBUS RTU output to a control system (PLC, DCS, etc.)
- Patented sensor change-out feature eliminates the need to declassify a hazardous area
- Pre-calibrated sensor modules are ready for installation out of the box
- Sensors can be replaced in the field without the use of tools. The unit quickly recognizes the new sensor type and reconfigures alarm and relay settings to optimize the new sensor.

## MSA Sensor Exchange Program

With the MSA Sensor Exchange Program, users receive replacement calibrated sensor modules when they are needed, on demand. Sensors can be scheduled to arrive prior to the calibration due date for easy installation and minimal downtime.

## Accessories

- Factory-assembled remote sensors are available in 25-, 50- and 100-foot lengths, enabling remote mounting of sensors in either a general purpose or explosion-proof enclosure.
- Strobes (one or two)
- Back-up battery
- Internal power supply

Specifications	
<b>GAS TYPE</b>	Toxics, oxygen and combustibles
<b>GAS SAMPLING</b>	Diffusion
<b>VOUTPUT TYPE</b>	4-20mA, 3-wire (non-loop power) (single-point only), ModBus RTU (3-points)
<b>SENSOR LOCATION</b>	Local or remote sensor (up to 100 ft.)
<b>ENCLOSURE</b>	General-purpose plastic enclosure
<b>SENSOR TEMPERATURE RANGE</b>	14°F to 104°F
<b>ACCURACY</b>	Repeatability +1% FS
<b>RELAYS</b>	5 Amp SPDT; 4 relays (3 alarm, 1 fault) @220 VAC or 30 VDC
<b>POWER INPUT</b>	Internal 120VAC/24VDC power supply
<b>ALARM TYPE</b>	Piezo horn (95 dB) with horn silence button
<b>BATTERY BACKUP</b>	Optional (up to 24 hours)
<b>ENVIRONMENTAL PROTECTION</b>	Designed to meet NEMA 4X

**Note:** This bulletin contains only a general description of the products shown. While uses and performance capabilities are described, under no circumstances shall the products be used by untrained or unqualified individuals and not until the product instructions including any warnings or cautions provided have been thoroughly read and understood. Only they contain the complete and detailed information concerning proper use and care of these products.
