The new **GALAXY GX2 Automated Test System** provides simple and intelligent testing and calibration of MSA ALTAIR® and ALTAIR PRO Single-Gas Detectors, as well as ALTAIR 4X and ALTAIR 5X Multigas Detectors, driven by the most advanced technology available in any portable gas detector: MSA XCell® Sensors.

This easy-to-use automated test stand offers high performance as either a stand-alone unit or an integrated portable detector management system, enabling total data access and control of MSA's ALTAIR Gas Detector fleet.

Once any ALTAIR Family Gas Detector is placed within the GALAXY GX2 System, it can be tested, calibrated and charged automatically. Flexibility allows for up to 10 test stations, four cylinder holders and multi-unit charger within one GALAXY GX2 System detector bank.

Ease of Use / Calibrate & Test Effortlessly

- Easy setup, simple use with touch-free testing.
- Color touch screen enhances user experience at the test stand.
- Can be used with a PC or as a stand-alone system, the perfect solution for large fleet end users, as well as for smaller applications.
- Automated test system and MSA Link™ Software (transfers portable gas detector records to a connected PC) provided as standard in many commonly spoken languages.
- Your ALTAIR 4X and ALTAIR 5X Multigas Detectors are always ready* for use. If you're faced with an urgent, short-notice situation, these units are ready for deployment, ideal for emergency applications.

** Contact your local sales representative regarding availability.*

Cost of Ownership / Save Time, Save Gas & Save Money

- Exceeds 50% reduction in cost of ownership, including calibration gas expenses when combined with high-performance MSA XCell Sensors.
- Faster total testing of ALTAIR Family Gas Detectors.
- Test up to 10 gas detectors simultaneously in the time most competitive systems take to test one device.
- RFID-tagged calibration gas cylinders to help ensure use of correct gas.

Proactive Safety / Command, Control, Configure

- With MSA Link Pro Software, proactively manage safety by addressing gas exposure information and missing or failed calibrations and bump tests.
- Calibration gas and expiration warnings provided by the GALAXY GX2 System and via advanced MSA Link Pro Software.
- Print calibration stickers for gas detectors to provide easy and fast user information.
- Query the system for gas exposures, and then email responses to users.
