CBRN- Chemical, Biological, Radiological and Nuclear

2. **CAUTIONS AND LIMITATIONS**

   - A - Not for use in atmospheres containing less than 19.5 percent oxygen.
   - J - Failure to properly use and maintain this product could result in injury or death.
   - M - All approved respirators shall be selected, fitted, used, and maintained in accordance with MSHA, OSHA, and other applicable regulations.
   - S - Special or critical User's instructions and/or specific use limitations apply. Refer to User's Instructions before donning.

3. **CBRN CAUTIONS AND LIMITATIONS**

   - R - Some CBRN agents may not present immediate effects from exposure, but can result in delayed impairment, illness, or death.
   - W - Follow the manufacturer's User's Instructions for changing canister.
   - X - Consult manufacturer’s User’s Instructions for information on the use, storage, and maintenance of these respirators at various temperatures.
   - Y - This respirator provides respiratory protection against inhalation of radiological and nuclear dust particles. Procedures for monitoring radiation exposure and full radiation protection must be followed.
   - Z - If during use, an unexpected hazard is encountered such as a secondary CBRN device, pockets of entrapped hazard or any unforeseen hazard, immediately leave the area for clean air.

   - HH - When used at defined occupational exposure limits, the rated service time cannot be exceeded. Follow established canister change schedules or observe end of service life indicators to ensure that canisters are replaced before breakthrough occurs.

   - QQ - Use in conjunction with personal protective ensembles that provide appropriate levels of protection against dermal hazard. Failure to do so may result in personal injury even when the respirator is properly fitted, used, and maintained.

   - UU - The respirator should not be used beyond eight (8) hours after initial exposure to chemical warfare agents to avoid possibility of agent permeation. If liquid exposure is encountered, the respirator should not be used for more than two (2) hours.
