

D-Ring Extender

Technical Datasheet

The removable D-ring extension lanyard is intended to simplify connection to the dorsal D-ring of a full body harness. The lanyard is part of a personal fall arrest system when used with an approved energy absorber.

The D-ring extender is attached to the dorsal connection of a full body harness through a choke connection.

Features & Benefits

Detachable lanyard	Provides the flexibility and ease of use
Abrasion resistant polyester webbing	For additional durability

Product Specifications

MATERIAL	
Webbing	Polyester, minimum tensile strength of webbing 25kN
D-Ring	Alloy Steel, minimum breaking strength 25 kN
TECHNICAL SPECIFICATIONS	
Connectors	A webbing loop at one end, steel D-ring at other end
Length	56 cm
Width	20 mm
Colour	Grey
Weight	0,2 kg
Operating temperature	-30 °C ... +50 °C
Maximum lifespan	10 years from date of manufacture
APPROVALS	
EN 354:2010
