## Cairns<sup>®</sup> XF1 Fire Helmet

## PART TRAILBLAZER. PART TOP GUN. ALL CAIRNS.

The design of the National Fire Protection Association (NFPA) 1971- and 1951-compliant Cairns XF1 capitalizes on the expertise of firefighters who wear jet-style fire helmets, while blending in the needs of the firefighter.

## **MEETING FIREFIGHTER NEEDS: BENEFITS OF THE CAIRNS XF1**

#### **REDUCED SNAGS**

The Cairns XF1 has been engineered as much for comfort and fit as safety. The most obvious feature is what it lacks the XF1 is brimless. While untraditional, the lack of a brim makes it easier to crawl into tight spaces and retain your helmet.

The optional integrated ocular visor provides additional eye protection that is easy to deploy, clean, and replace. The internally-mounted communication headset snaps easily inside the helmet, providing incoming communication right to the ear, where it's needed most.

**LIGHTING THE WAY** 

This compact light accessory is housed inside the helmet, reducing exposure to heat, flames, and impact. The strategic placement of LED lights on either side of the helmet improves visibility in dark conditions without detracting from others' vision.

**PERSONALIZED FIT** 

Several easy-to-find adjustments can be made enabling the fire helmet fit to be customized to the individual. When it's all said and done, the XF1 doesn't just fit firefighters it fits most of them comfortably.<sup>2</sup>

EASY TO CLEAN

The Cairns XF1's modular design allows it to be quickly disassembled for thorough inspection, care and maintenance. Plus, the helmet's soft goods are removable, washable and replaceable—all without the use of tools.

**CUSTOMIZED LOOK** 

The Cairns XF1 is available in four colors (black, white, yellow, and red), and two finishes (matte and glossy), so firefighters can choose a look that fits their style. Customized front plates in a variety of colors and custom printing are also available.

<sup>1</sup> Accessories are not certified to NFPA; however, their addition to the helmet does not affect NFPA compliance. <sup>2</sup> This information based on Beta trial of 250 participants with various facepieces, including competitor SCBA.
