Dear Customers and Channel Partners:

MSA continues to work through multiple supply chain constraints that can impact customer delivery and fulfillment. With that in mind, we have determined that we will no longer accept any new orders of Comfo **Short Stack Version** combination GMA-P100 (Part number 815186) and GMC-P100 (Part number 815188) cartridges as of January 01, 2023. We will continue to fulfill all orders placed by December 31, 2022. This discontinuation impacts the **Short Stack** versions only and no other Comfo series cartridges are included.

As replacement, customers can continue to purchase our standard Comfo GMA-P100 (Part number 815178) and GMC-P100 (Part number 815180) cartridges. These two standard Comfo cartridges provide the exact same protection as the short stack versions and are NIOSH approved to all of the same threats as the short stack versions. If any questions, please contact our Customer Service or Regional Sales Representative. The following images show the physical differences in the Short Stack vs. Standard version combination cartridges (GMA-P100 Shown).

GMA-P100

GMA-P100 Short Stack

Thank you for your continued support while we go through the phase out process! As always, MSA values your business, and will make an effort to meet your expectation.

Sincerely yours,

Lillian Blazina
