## +5: Enhanced MSA Protective Eyewear

---

*BERLIN, February 2013* – MSA adds five new models of safety spectacles and goggles to its wide range of Protective Eyewear. Stylish design, extreme robustness as well as excellent wearing comfort, are features to increase wearer acceptance and safety.

**Alaska:** The frameless design with metal parts sets new standards in stylish eyewear. Lightweight and with padded nosebridge Alaska ensures all day comfort offering very good impact resistance.

**Blockz:** The stylish and functional safety spectacles convince with features like sliding temple adjustment and adjustable soft nosebuds ensuring a comfortable fit. The large wrap around lens with good impact resistance provides excellent protection.

**FeatherFit:** The modern and lightweight spectacles for the entry level have a perfect price performance ratio. With reliable impact resistance and snug fit wrap around lens FeatherFit offers perfect vision and protection.

**OverG:** Designed to be worn over today's small- and medium-framed prescription eyewear the OverG features reliable impact resistance and full front, side and top protection. With a great price performance ratio it is the perfect visitors spectacle.

**FlexiChem:** The comfortable goggle with increased chemical resistance offers reliable protection for various applications. With its acetate lens the FlexiChem resists splashes and large dust particles. The pliable frame and indirect ventilation enhance comfort and fit.

Responding to a multitude of customer requests MSA also introduces four additional versions of existing models to complete the portfolio. All MSA eyewear models are of high quality and comply with all relevant European standards. They are used in many industrial workplaces to protect against mechanical, chemical and radiation hazards.
