New Eyewear Models

Coatings

The following coating options protect your lenses from the daily risk of scratching and ensure good vision even at increased humidity or temperature changes. All coatings have anti-static properties.

TuffStuff

Excellent service time enhancing anti-scratch coating according to EN166 "K".

Sightgard

Anti-fog coating with good anti-scratch properties.

Sightgard+

Premium anti-fog coating (EN166 "N") with good anti-scratch properties.

OptiRock

Durable high performance anti-fog coating with outstanding anti-scratch properties according to EN166 "KN".

Features

All MSA spectacles are light and sit comfortably on the face, even after hours of use. Ergonomic design features increase the safety of the wearer and their sense of reassurance.

Temple inclination

Easy-to-use ratchet system. Adaptation to individual face shapes to ensure gap-free all-around protection.

Length adjustment

Easy adjustment to individual headsize for a perfect fit and universal use.

Soft temples

Soft co-injected materials significantly increase wearer comfort and safety as spectacles remains in a perfect position.

UV400

Absorbs 100% of harmful UV radiation, with wavelengths up to 400 nm, preventing longterm damage to the eye.
