

CONFINED SPACE AWARENESS | COURSE NO. ZT-CSAWARE (8 HRS)

MSA's 1-day Confined Space Awareness training course is designed for those individuals who are responsible for managing and overseeing employees working in confined space entry activities. It is recommended for **facility managers, team leaders, supervisors** and those individuals who will **manage third-party contracted** confined space entry operations at their facilities.

Course Format:

Training is instructor led multimedia presentation incorporating instructor demonstration, student manual and learner practical hands-on approach. Training will run approximately 8 hours. Learners will be given a written exam and will receive a certificate of completion with training contact hours, signed and dated by the MSA Instructor upon successful completion of the scheduled training.

The 1-day course is comprised of the following:

- Defining Confined Spaces
- Explain legislative consensus standards and operational requirements
- Identify typical hazards and associated risks
- How to assess and control hazards
- Manage entry permits and hot work permits
- Identify hazardous energy sources and select adequate LOTO and isolation equipment
- Managing contractors and coordinating documentation
- Selection, application & maintenance of adequate equipment for confined space entry, fall protection, gas detection
- Explain roles, responsibilities and procedures for confined space operations
- Requirements for plans and procedures for confined space entry
- Emergency response procedures and confined space rescue hierarchy techniques
