

Your expertise. For the safety of tomorrow.

MSA stands for the development, production and sales of professional safety equipment and gas detection technology: We are „The Safety Company“. We have been developing products that save lives for more than 100 years – from innovative harness systems to smart gas detection devices. Customers in around 140 countries put their lives in our hands every day. More than 5,000 employees at 42 locations around the world take on this great responsibility. Together we pursue one objective: making people’s work safer.

In order to further expand our team in Berlin, we are seeking the following from 1 January 2017:

Software Developer (Front End) m/f

A team of international specialists creates the safety technologies of the future in our Research & Development department in Berlin – taking an agile and passionate approach in close collaboration with developers around the globe.

Your task in our team

In your role as a software developer (front end), you will give our cloud-based software solutions their character. These are some of your most important responsibilities

- **Planning:** You will prepare project requirements and specifications while working together with colleagues from marketing.
- **Developing:** You will implement sophisticated front-end applications in line with our standards and with the help of tools like JIRA, Confluence or Bamboo.
- **Testing:** In close collaboration with our test engineers, you will automate software tests and thereby support our continuous release process.
- **Optimising:** You will also draw on your expertise to continually improve existing tools and processes.

Your profile: expertise meets experience

We are looking for people who would like to further develop their existing web expertise in challenging projects. Your four facets:

- **Academic:** You have successfully completed a degree in computer science or a comparable field.
- **Practitioner:** You can look back on at least three years of professional experience in product development.
- **Specialist:** Extensive knowledge of front-end technologies (JS, CSS, etc.) is a must, while experience with Angular JS, AWS, agile projects and test-driven development is a plus.
- **Team player:** You enjoy working with people across various disciplines – including in an international setting thanks to your fluent English skills.

What makes us a great employer?

Only with the best employees are we able to remain a leader of innovation. We provide the ideal environment for our employees:

- **Excellent facilities:** Our Research & Development team in Berlin works with state-of-the-art IT infrastructure.
- **Individual career paths:** We offer various development prospects on the basis of personal wishes and talent.
- **Flexible working hours:** Alongside our flexitime model, there is also the option of working from home.
- **Swift decisions:** We combine the stability of an established company with the functioning of a young technology enterprise.
- **Fantastic team:** Benefit from the diversity of your highly qualified colleagues and work with them to further hone your skills!

Can you imagine creating modern safety technology with us?

If so, we look forward to receiving your application (including your earliest start date) at HR.de@MSAsafety.com.

Do you have any further questions?

Our recruiting team will be happy to help. Give us a call: 030 6886-1856.
