

C.A.R.E. PROGRAM OVERVIEW

C.A.R.E. is an acronym for Certified Airmask Repair Education. Our Self-Contained Breathing Apparatus (SCBA) maintenance courses are specially designed and developed to address the MSA Air Mask repair and maintenance requirements of both our Channel Partners and end-users.

C.A.R.E. classes should only be attended by those individuals who are, or will be, assigned to maintain and repair MSA Air Masks on a frequent basis and have the mechanical aptitude, experience and skill-set to perform the work requirement.

Successful completion of the class certifies an organization as an MSA Authorized Air Mask Maintenance Center, enabling C.A.R.E. Certified Repair Persons to perform the highest level of SCBA maintenance and repair on MSA Air Masks.

C.A.R.E. program classes are offered at pre-determined locations and dates. Advance registration is required. An invoice will be mailed to you upon completion of the class. Transportation and lodging is the responsibility of the individual.

Included in the course fee is:

- The hands-on C.A.R.E. Training Class, conducted by an MSA factory trained instructor
- Use of the appropriate SCBA Regulators, Audi-Larm™ assemblies, cylinder valves and tools for hands-on disassembly and reassembly
- A C.A.R.E. Certified Maintenance Manual and support material,
- Lunch and refreshments during breaks in the training.

At the completion of the training class, each attendee must successfully complete a written examination based upon information presented during the class. MSA will notify the attendee's as to its certification based on the examination results.

Class size will be kept to a minimum to provide consistently high quality instruction to each attendee.
