## FOR C.A.R.E. TECHNICIANS USING THE BETA VERSION OF THE MSA SOFTWARE FOR THE POSICHEK

This PIN Article addresses an upgrade that allows users to resume a previously suspended test.

**Note:** Users of Beta version 3.23P should update to Beta version 3.24P at [http://www.biodownloads.com/html/posi\\_msa\\_Us.htm](http://www.biodownloads.com/html/posi_msa_Us.htm). MSA. US version 3.22 is not affected.

The Beta version of the MSA software for the PosiChek was recently updated. The update corrected a bug in the Beta version. The bug was in the "Resume Previously Suspended Test" button on the "Complete SCBA Test" form. In the Beta version 3.23P, resuming a test caused the information in the resumed test to be lost.

More information about this function is available in the help file topic "Resuming a Test".

The screenshot shows the MSA BioDownloads website interface. The top navigation bar includes "BioDownloads Home" and "PosiChek Software ► MSA US". The main content area is divided into several sections:

- MSA US:** Version 3.22, Posted 2005 Feb 23, Type Program, Size 33MB, Download button. \*Patch Size 2MB, Download button.
- Beta Version:** Version 3.24, Posted 2006 Apr 18, Beta Info button, Type Program, Size 35MB, Download button. \*Patch Size 3MB, Download button.
- Documents & Links:** Links to [posichek.com](http://posichek.com), PosiChek Language Files, and MSA Metric.
- Help File:** Version N/A, Posted 2005 Sept 07, Size 5MB, Type Help File, Download button.
- Comments:** A note stating that patch files require a 32-bit full version of the same type to be previously installed, and that help files are updated with the most recent released version of the software.
- PR-14 Update:** A note stating that beta version upgrades contain model information and other changes needed to test the new PR-14 models.
