

FP Stryder™ Anchorage Connector Features & Benefits

| FEATURE | BENEFIT |
|--|---|
| Single hand installation | Quick and easy to install |
| Low Friction Wear Pads with Teflon® | Eliminates metal-to-metal contact and allows the FP Stryder to effortlessly glide along the beam flange |
| Lightweight | Easy for worker to carry around the jobsite |
| Integral Load Indicator | Deforming window allows user to easily determine if the system has been exposed to a fall |
| Above Beam or Below Beam Mounting Capabilities | Provides the versatility to work in most applications |
| Vernier Adjustability | Allows for a snug fit on the beam and ¼" adjustment intervals |
| 400 Pound Working Capacity | No need to order special products for workers over 310 pounds. The same product can be used for all of your workers |
| 2 models available to fit flange widths from 4" – 24" | Increases versatility to fit most I-Beam applications |
| Field serviceable | No need to return the unit to the factory for repair, reducing down-time |
