

# 10K Mega Swivel Hybrid Hole Diameter

Technical Brief FP-PC017

## Correction to MSA User Instructions

---

It has recently come to our attention that there is an error in our user instructions for the Mega Swivel Hybrid anchorage connector, PN 10144957. On page 20, the instructions state to drill a .75" hole for installation of the 10K Mega Swivel Hybrid Anchorage Connector. This should be a 1" diameter hole.

The MSA user instructions will be updated to reflect this change. This technical brief will serve as clarification in the meantime.

We apologize for any inconvenience.
