

Find out how the PremAire Combination can meet your application needs

The [PremAire Combination](#), a combination supplied airline respirator with compressed air cylinder is designed to be versatile, comfortable and affordable. The completely new hip-mounted [PremAire Combination](#) is equipped with MSA components which have been field proven over many decades

Air delivery (pneumatics)

- Pressure reducer ([AutoMaXX](#)) cannot be over breathed (tested to 580 lpm)
- Over 10 years of proven field performance in very demanding firefighting and rescue applications: Refineries, OGP plants and city fire departments

Superior components performance

- MSA's decades of experience in researching, testing and approving the right materials to protect against potential hazards
- [3S](#) Full Face Mask option based on the successful [3S](#) mask platform with millions sold over the last 40 years.
- Proven performance over a wide temperature range (-40°C to +60°C)
- ATEX certification for complete device (not just the cylinder cover)

Fit for purpose

Industrial applications

- Use of the right materials in face pieces, LGDVs and medium pressure hoses minimises the risk of permeation by toxic gases (e.g. H₂S)
- Ease of entry into tight confined space
- Ease of manoeuvring up and down caged ladders – ease of disconnecting and reattaching the air cylinder
- Convenient refilling of air cylinders via an easy access filling port (Quick Fill compatible)

Fire service applications

- Short duration SCBA option available with either 2.0 or 3.0 l composite cylinders [PremAire Combination Mini](#)
- [PremAire Combination Mini](#) configuration with 2.0 l composite cylinder has a total weight of less than 5.0 kg, thereby conforming with the German G26 criteria for occupational health care / principle 26 (Group 2)

Contact your MSA sales representative for a live demonstration. You will soon see why the [PremAire Combination](#) is the right choice for your versatile application needs.
