MSA Police Line: 2007 Product Highlights

MSA POLICE LINE

Protecting the protectors since 1914.

2007 Product Highlights

Advantage® 1000 RCA Gas Mask (Riot Control Agent)

Has a flexible, single polyurethane lens with wide field of vision, bonded to a durable Hycar rubber facepiece.

NIOSH-Approved for CBRN

Millennium® CBRN Gas Mask

The first APR to receive NIOSH certification as "compliant against CBRN." It is a Hycar rubber version of the military MCU-2P gas mask that combines high performance, customized fit, comfort, and cost efficiency.

NIOSH-Approved for CBRN

Ultra Elite® CBRN Gas Mask

Joins MSA's CBRN respiratory protection products for response to any incident, accident, or unknown threat. Field-proven and trusted by first responders to provide exceptional fit, comfort, and value.

NIOSH-Approved for CBRN

Universal Safe Escape™ Respirator - NEW!

New universal size with translucent hood, self-adjusting cradle-type head straps, bonded wide-view lens, and CBRN canister. NIOSH-certified for 15-minute escape, packed in a hexagonal storage case with a 5-year shelf life.

S-Cap Fire Escape Hood - NEW!

Smoke filtering escape hood designed to protect from smoke and gases (carbon monoxide) generated by fire. Hood offers 15 minutes of protection depending upon concentration of contaminant.

BlackHawk™ Tactical SCBA

Combines MSA SCBA's finest features with special modifications to eliminate reflections and audible sounds that would compromise concealment. With mask-mounted regulator, sized facepieces, choice of cylinders, and air refill and air-line options.

MSA Responder™ PAPR

A belt-mounted powered air-purifying respirator with choice of two proven tight-fitting facepieces, each in 3 sizes. The motor/blower provides constant air flow, and a positive pressure seal.

ThermalTrac™ Thermal Imager - NEW!

Proven camera displays infrared energy, identifies heat sources, and allows law enforcement tracking in dark conditions.

Aurora™ Protective Eyewear

Wraparound stylish eye protection with choice of gray, clear, amber or blue mirrored anti-fog lens. Soft, straight-back temples with vertical ratchet adjustment. "Easy-fit" adjustable nose bridge.

Paraclete Body Armor - NEW!

Concealable Body Armor

ForceField™ Alpha: Versatile jersey-style carrier with exclusive Armor-Latch™ secure closure. Maximum comfort, reliable ballistic coverage with Flex Panel™ sizing.
ForceField Bravo: Traditional style, low-profile comfort with Flex Panel sizing.

Tactical Body Armor

Releasable Modular Vest (RMV)

Patented vest quick release feature allows immediate armor removal for emergency escape or medical care administration.

Ballistic Helmet

ForceField ACH Advanced ballistic protection includes innovative retention and suspension system. Low-profile design reduces target acquisition interference risk and ensures compatibility with NVGs, gas masks, and communication devices.

Supreme Pro™ Hearing Protection

Lightweight, comfortable, easy to use, and reliable. Unobtrusive microphone/sound transmission system interfaces with radio transceivers and intercom systems.

SAFESITE™ Hazardous Gas Detection System

Detects and communicates the presence of chemical warfare agents (CWAs, nerve and blister agents), volatile organic compounds (VOCs) and many toxic industrial chemicals (TICs). The SAFE-CONNECT™ Belt-Bridge works with the Sirius® Wireless Interface for integration into the SAFESITE® Multi-Threat Detection System. Gas readings and other mission-critical information can be communicated from an existing Sirius Multigas Detector back to the SAFESITE System for remote viewing within a wireless network. Transportable and operational for use at public events or integrated permanently into building or mass transportation systems.

Sirius™ PID and Multigas Detector

Multifunctional capabilities are offered by integrating a high-performance PID (photoionization detector) sensor within a 4-gas detector. Simultaneously monitors for VOCs while measuring combustible, toxic, and oxygen-deficient atmospheres.

HAZMATCAD™ & HAZMATCAD™ Plus Hazardous Material

Chemical Agent Detectors
Ruggedly constructed, compact, lightweight, and extremely easy to use, requiring no prior training. A single key press begins automatic sampling and analysis.
