

Your expertise. For the safety solutions of tomorrow.

MSA development, production and sales of professional safety equipment and gas detection technology: We are „The Safety Company“. We have been developing products that save lives for more than 100 years – from innovative harness systems to smart gas detection devices. Customers in 140 countries put their lives in our hands every day. Our more than 4,700 employees in 42 locations worldwide accordingly take on great responsibility. Together we pursue one objective: We make the lives of workers in action safer.

For our team in Berlin, Germany, we are looking for a highly skilled and motivated

Continuous Improvement Project Manager (m/f)

In this role, you act as project manager for multiple projects with high impact on our enterprise's performance, corporate strategy and operations. You report to the Global Continuous Improvement Manager.

Your tasks on our team:

- You act as project manager, including owning project schedules and deliverables, for multiple projects with high impact on the enterprise's performance or corporate strategy including critical operation support projects.
- You take complete ownership of projects and drive them to meet budget and milestone goals as prioritized by customer and sponsor needs.
- You proactively identify risks and problems impacting project goals as well as the potential for cost savings and efficiency enhancements.
- You develop and implement solutions to avoid delays to project schedules and budgets.
- You effectively communicate project results and needs appropriately to all levels of the organization, both written and verbal.
- You receive feedback and change course when necessary to drive optimal results.
- As an expert in operations systems and other business systems, you lead projects across the entire range of operations and business functions.
- You model your behaviors to support the MSA Operating System and consistently meet commitments.
- You coach junior members on basic project management skills.

Your profile:

- You have a bachelor's or master's degree in industrial engineering and continuing education in project management.
- You have 7 years of relevant experience (a master's degree may be substituted for 2 years of experience, and a Ph.D. may be substituted for 4 years of experience).
- You are a strong communicator, both written and verbal.
- You are very good at planning and organizing with excellent analytical and problem-solving skills.
- You can build strong relationships with frontline managers and employees.
- You like working in a fast-paced, high-energy environment and handling multiple projects.
- You are able to drive execution with a passion for results and aligning performance for success.
- You have experience in coaching and developing other employees.
- Preferably, you are experienced in a manufacturing environment.
- You have experience with Lean, 6-Sigma or other continuous improvement processes and tools.
- You are willing to travel 30-50 % of your work time.
- You're ready to relocate to Châtillon (France), Glasgow (Scotland) or Devizes (U.K.) after 2-3 years.

MSA as an employer: What makes us unique

Only with the best employees are we able to remain a leader of innovation. We provide the ideal environment for our employees:

- **Individual career paths:** We offer various development prospects on the basis of personal wishes and talent.
- **Flexible working hours:** Alongside our flexitime model, there is also the option of working from home.
- **Swift decisions:** We combine the stability of an established company with the functioning of a young technology enterprise.
- **Fantastic team:** Benefit from the diversity of your highly qualified colleagues and work with them to further hone your skills!
