

Your expertise. For the safety solutions of tomorrow.

MSA development, production and sales of professional safety equipment and gas detection technology: We are „The Safety Company“. We have been developing products that save lives for over 100 years – from innovative harness systems to smart gas detection devices. Customers in 140 countries put their lives in our hands every day. Our more than 4,700 employees in 42 locations worldwide accordingly take on great responsibility. Together we pursue one objective: We make the lives of workers in action safer.

For our team in Berlin, Germany, we are looking for a highly skilled and motivated

Software Developer Full Stack (m/f)

In this position, you are responsible for the implementation of new cloud based software products according to MSA standards. You work closely together with our DevOps team in a Continuous Release process and act as a proactive team player with Marketing and other R&D departments, while driving project execution with passion for results.

Your tasks on our team:

- You design and implement web backend applications using processes and tools according to MSA standards while always keeping track of the key metrics defined for the project.
- You design and improve existing processes and tools.
- You support the verification and testing of software products, writing manual and automatic test cases and working closely together with test engineering.
- As an active part in the Community of Practice, you participate in discussions and meetings within the core team and with external teams, especially other R&D departments.

Your profile: Expertise meets experience

- You have experience in web application development.
- You have completed a Bachelor Degree in Computer Science, Computer Engineering, Software Engineering or related field, a Master's Degree in those fields is preferred.
- You have experience in web backend technologies, e. g. Node.JS.
- You have experience with SQL and NoSQL databases.
- You are fluent in English.
- You are willing to travel about 10% of your work time.
- You are experienced in Agile projects and test driven development.
- Preferably, you already have experience in Data Analytics and Amazon AWS.
- Preferably, you have been working in product development for at least 3 years.

MSA as an employer: What makes us unique

Only with the best employees are we able to remain a leader of innovation. We provide the ideal environment for our employees:

- **Excellent facilities:** Our Research & Development team in Berlin works with state-of-the-art IT infrastructure.
- **Individual career paths:** We offer various development prospects on the basis of personal wishes and talent.
- **Flexible working hours:** Alongside our flexitime model, there is also the option of working from home.
- **Swift decisions:** We combine the stability of an established company with the functioning of a young technology enterprise.
- **Fantastic team:** Benefit from the diversity of your highly qualified colleagues and work with them to further hone your skills!

Interested?

We are looking forward to receiving your application. Please send your application documents in English with details of your desired salary and earliest start date by e-mail to: Karriere@MSAsafety.com
