* Use the table below to determine the total number of equivalent detection points:

Sensor or Monitor Type	Equivalent Sample Points
Ultima X Series, Prima X, FlameGard, Z-Gard, Chillgard LS, Chillgard NH ₃ , Chillgard LE, Toxgard II	1 Point each Sensor
OPIR, Senscient ELDS Open Path Detectors	2 Points per Source/Detector Pair
TriGard Monitors, Tri-Gas Monitors	3 Points per Monitor
Chillgard RT, Chemgard	4 Points per Monitor
Observer-i	6 Points per Detector
Multigard Sampling Systems	8 Points per Multigard
Suprema Touch, MODCON 75, HazardWatch	Number of Points of Detection
GasGard 100—must also order configuration service from Custom Products. Commissioning does not include programming of the GasGard 100.	Number of Points of Detection

Premium Commissioning Service

- Inspection and verification of system installation and configuration
- Complete start-up / commissioning of entire system with functional testing
- Calibration with NIST-traceable calibration gases and calibration certificate provided
- Hands-on training on installed system at time of commissioning. Note: this is not classroom instruction.
- MSA warranty initiated with warranty upgrade to include onsite warranty repair
- All work done by MSA service professionals; no subcontractors
- Includes all travel time, mileage, and related travel expenses; no extra charges

Note: Commissioning services require at least 2 weeks advance scheduling with MSA. Additional charges will apply if less than 2 weeks notice is given to MSA Service.

Prices are good anywhere in the Continental U.S. and Canada—valid through 12/31/18.
