Features: Maximum UV protection

Eyewear Features

MSA Sightgard® Protective Eyewear line offers **great styles – great options – great value:**

- Anti-fog coating and/or UV 400 additive offered on many styles.
- Anti-scratch coating provides excellent scratch resistance, extending lens life—a “must have” in abrasive work environments.
- Horizontal (sliding) or vertical (ratchet) temple adjustment models offer custom fit.
- Soft rubber nose bridges offer comfortable, non-slip support.
- Flexible rubber-tipped temples provide comfortable, all-day wearing.

Choosing the Proper Lens

Choosing the right lens for the job will not only protect eyes, but may also improve the wearer’s working experience.

Any models of MSA Sightgard Protective Eyewear, regardless of lens color or tint, provide UV protection. For maximum UV protection, look for models that offer UV400 lenses. The Lens Color Reference Chart shown here lists the benefits and uses for common lenses and tints.

Need additional help or have questions about MSA Sightgard Safety Eyewear? Contact MSA Customer Service at 1-800-MSA-2222 for additional information.

LENS COLOR/TINTS	USE
Amber 	Good for low-light conditions, especially at dawn/dusk and on foggy days. Increases contrast and enhances detail. Ideal lens for operations requiring optimum contrast of similar or small objects.
Clear 	General purpose lens for indoor use, or outdoor use in low-light conditions. Provides maximum light transmission with impact protection.
Light or Dark Brown 	Enhances perception in changing light and shadow. Good for low light conditions.
Gradient 	Allows easy transition from inside to outside with same pair of glasses. Ideal for use while driving.
Gray 	Most popular lens tint for outdoor use. Protects against visible glare without color degradation. Good choice for outdoor work, such as construction and landscaping.
Indoor/Outdoor Mirror 	Offers the same benefits as light mirror, but also allows for easy transition from inside to outside with same pair of glasses. Ideal lens for occupations such as forklift drivers, dock workers, and truck drivers.
Light Mirror 	Reduces glare and bright sunlight by reflecting light away from the lens. Enhances contrast without color degradation. Good general purpose lens for outdoor use.
Rich Mirror 	Superior glare reduction with heavy mirroring. Great lens for outdoor use in full sun conditions—favored by outdoor workers such as roofers, landscapers, and builders.

Essential Euro Adjust Protective Eyewear

Adjustable temples
Maximum UV protection

Essential Euro Adjust Protective Eyewear

P/N: **10119754** Silver mirrored

P/N: **10119755** Sky blue mirrored

Features: Adjustable temples
Maximum UV protection

Safety Sense

Eyewear Maintenance and Handling Tips

- ✓ Always remove safety glasses by putting one hand on each temple and pulling straight forward. Handling glasses by only one temple can stress the frame. Although stress fractures may not be seen by the naked eye, they can weaken the impact resistance of safety eyewear over time.
- ✓ Pitted, scratched, or cracked eyewear reduces protection and clear vision. Contact with certain chemicals, including sunscreens and bug repellents, may cause cracking. All plastics degrade over time. Inspect routinely and replace damaged eyewear immediately. Replace safety eyewear at least every two years, even if no damage is evident.
- ✓ Keep eyewear clean using cleaning materials made for your lens type. Make sure to follow MSA's instructions for cleaning to prolong the life of your MSA Sightgard Protective Eyewear.

Finding the Right Eyewear

Face Shape and Size

Look for frames that complement your facial features.

				
Round face	Diamond-shaped face	Square face	Slender face	Larger face
Choose rectangular frames to sharpen round, soft faces.	Choose oval frames to soften angled facial contours.	Cat-eye frames provide sleek, curvy contours to square features.	Choose small frames designed for slender faces to keep proper facial proportions and improve fit.	Choose frames with flexible temples, spring loaded or serpentine hinges for a comfortable, custom fit.

Frame Material

Choose a frame material that suits your style and needs.

Polycarbonate

- More impact-resistant than standard plastic frames
- Thin, lightweight, and strong make it an ideal choice for work environments
- Endless color choices and finishes

Nylon

- Maintains shape and flexibility even in hot/cold environments
- Improved chemical resistance

Metal

- Strong, yet flexible
- Popular with younger workers
- May not be a good choice for all work environments

Safety Goggles

Sightgard® NV Safety Goggles

P/N: 10106268 Clear

MSA Logo Eyewear Program

How it Works

Want to customize your Sightgard Protective Eyewear with a company logo or design for a truly distinctive look? Check out the following guidelines to get started, and then call MSA Customer Service at 1-800-MSA-2222 for prompt assistance with your customized order.

Minimum Order Quantity (MOQ)	1,152 eyewear pairs per logo/model/order. Example: A customer wants to order a clear eyewear model and a grey eyewear model with the same logo. MOQ is 1,152 for the clear model and 1,152 for the grey model for a total of 2,304 pairs.
Shipment	MSA will not hold stock of customized eyewear. The entire MOQ will be shipped upon receipt of payment by MSA. Expedited delivery is available with some models. The customer is responsible for air freight costs when requesting expedited delivery.
Lead Time	For an MOQ of 1,152 pairs, lead time is 75 – 90 days from the date the order is placed with MSA.
Logo/Design Submission	The logo/design graphic file can be sent as an e-mail attachment. (Do not embed graphic in e-mail.) Acceptable file formats include ONLY : .tif, .gif, and .jpg. NOTE : .pdf formats are not acceptable.
Cost	Determined by model selected. Not all models are eligible for logo/design application. Logo/design costs per eyewear pair are an additional \$0.55 USD (one color) to \$1.15 USD (six colors) over the net price of the eyewear model quoted.
Other Considerations	<ul style="list-style-type: none"> MSA will place the order upon written customer approval of a picture of the eyewear with its logo/design, or the actual eyewear model with its logo/design, as preferred by our customer. Logos/designs cannot be applied to product packaging.
