Introducing
Dust GoggleGear

Now it's a SNAP to change your safety eyewear to dust goggles.

Almost every factory has a dusty area. In fact, "particulates in the eyes" is the most common form of eye injury. However, many workers don't like wearing goggles because they're uncomfortable, and they block much of the view of the work area.

But that's all changed. Now, your workers can change their Lexa eyewear into comfortable impact/dust goggles by simply snapping the GoggleGear adapter onto the eyewear.

DUST
GOGGLEGEAR™
for LEXA™

DUST

GOGGLEGEAR™
for LEXA™

Soft foam on adapter seals out particulates, and is comfortable for all day use. The polyurethane foam is easily cleaned, and is self-extinguishing.

GoggleGear snaps onto the back of the Lexa lens, and "lock" securely into place over the temple "studs".

Lexa with GoggleGear offers a wider view of the work area than traditional impact goggles.

Lexa and GoggleGear together are lighter weight than most goggles for all day comfort.

GoggleGear is designed with "vent channels" on top and bottom. The resulting air flow removes hot, moist air from the inside for more comfort, and it bathes the inside of the lens with cooler air to minimize fogging.

The patented, contoured lens of Lexa is protected by the proprietary "DX™" anti-fog, anti-scratch, anti-static, anti-chemical attack coating to extend the life of the lens and to minimize fogging.
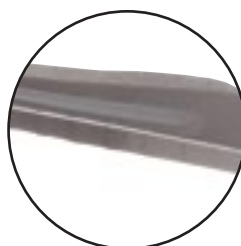

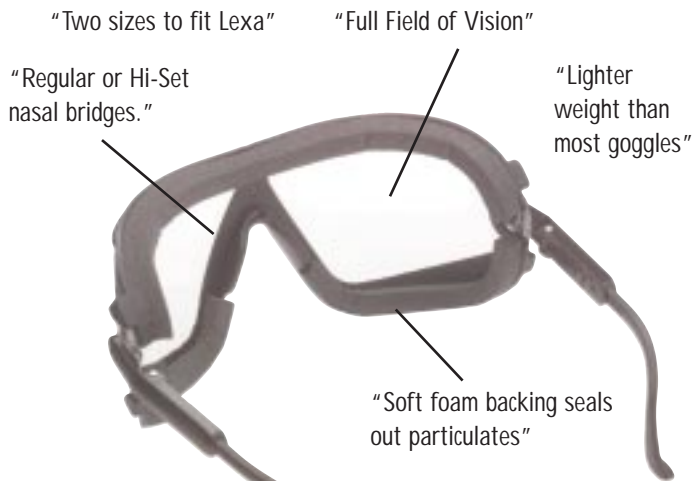

GoggleGear is available in two sizes, Medium and Large, to fit the two sizes of Lexa. GoggleGear is also available with a Hi-Set bridge*.

For especially active applications, workers can attach "HOOKZ™" to the temples of the Lexa, or they can replace the temples with an optional strap.

Lexa eyewear meets the safety spectacle requirements of ANSI Z87.1 and CAN/CSA-Z94.3. When GoggleGear and Lexa are combined, they meet the impact goggle requirements of ANSI Z87.1.

"Two sizes to fit Lexa"

"Full Field of Vision"

"Regular or Hi-Set nasal bridges."

"Lighter weight than most goggles"

"Soft foam backing seals out particulates"

"Vent channels at top and bottom for improved air flow"

Using GoggleGear Is As Easy As One, Two, Three!

"Strap option or HOOKZ accessory available"

"DX" Anti-fog coating minimizes fogging"

* High-Set Bridge version is not CSA approved.

Product Codes	Description
16600-00000	GoggleGear, Medium, Standard Bridge
16601-00000	GoggleGear, Large, Standard Bridge
16605-00000	GoggleGear, Medium, Hi-Set Bridge
16606-00000	GoggleGear, Large, Hi-Set Bridge
