

Your expertise. For the safety solutions of tomorrow.

MSA stands for the development, production and sales of professional safety equipment and gas detection technology: We are „The Safety Company“. We have been developing products that save lives for 100 years – from innovative harness systems to smart gas detection devices. Customers in 140 countries put their lives in our hands every day. Our more than 4,300 employees in 42 locations worldwide accordingly take on great responsibility. Together we pursue one objective: We make the lives of workers in action safer.

In order to further expand our team in Berlin, we are seeking a

Software Developer (fullstack) m/f

A team comprising international specialists works on the safety technologies of tomorrow in our Research & Development department in Berlin – taking an agile and passionate approach and in close collaboration with developers around the globe.

Your task in our team

In your role as Software Developer, you will give our cloud-based software solutions their character and you implement a high-performance architecture that provides access to safety data for our clients – in real time. These are some of your most important responsibilities:

- **Planning:** You will prepare requirements and specifications for our platform hosted on AWS while working together with colleagues from Marketing.
- **Developing:** You will implement sophisticated cloud-based web applications with the help of tools like JIRA, Confluence or Bamboo.
- **Testing:** In close collaboration with our test engineers, you will automate software tests and thereby support our continuous release process.
- **Releasing:** Together with colleagues from our DevOps team, you will plan and execute your releases.
- **Optimising:** You will also draw on your expertise to continually improve existing tools and processes.

Your profile: Expertise meets experience

We are looking for people who would like to further develop their existing web expertise in challenging projects. Your four facets:

- **Academic:** You have successfully completed a degree in computer science or a comparable field.
- **Practitioner:** You can look back on at least three years of professional experience in product development.
- **Specialist:** Extensive knowledge of web technologies (JS, HTML, CSS, Node.js) is a must, while experience with Angular JS, AWS, agile projects and test-driven development is a plus.
- **Team player:** You enjoy working with people across various disciplines – including in an international setting thanks to your fluent English skills.

MSA as an employer: What makes us unique

Only with the best employees are we able to remain a leader of innovation. We provide the ideal environment for our employees:

- **Excellent facilities:** Our Research & Development team in Berlin works with state-of-the-art IT infrastructure.
- **Individual career paths:** We offer various development prospects on the basis of personal wishes and talent.
- **Flexible working hours:** Alongside our flexitime model, there is also the option of working from home.
- **Swift decisions:** We combine the stability of an established company with the functioning of a young technology enterprise.
- **Fantastic team:** Benefit from the diversity of your highly qualified colleagues and work with them to further hone your skills!

Interested?

We are looking forward to receiving your application. Please send your application documents in German and English with details of your desired salary and earliest start date preferred via e-mail to: Karriere@MSAsafety.com
