At the MSA Toronto Factory Repair Service Centre we are here to offer solutions to your MSA gas detection and safety equipment service needs. We will give you the peace of mind you need knowing your repaired or serviced equipment will be in top operating condition when it leaves our facility

What does our factory repair/service give the customers?

- We operate in compliance with our **ISO 9001:2008** certification
- We have MSA factory trained, highly skilled technicians on staff
- We have on-line access to MSA factory specs, manuals and drawings.
- We have state of the art test equipment calibrated regularly for accuracy traceable to National Standards
- Our technicians use ESD devices to assure there is no damage from electrostatic discharge to the electronic components in your instruments while we service them
- Our calibration gases are certified mixes. Certificates are kept on file
- Our compressed air for filling your SCBA cylinders is laboratory tested bi-annually to ensure it meets CSA standards for pureness
- We can offer you a tailor made Preventative Maintenance contract for your gas detection and safety equipment to suit your needs
- We can offer site service at your location for your convenience
- We carry a wide range of repair parts in our shop and service vehicles to give you prompt service to your equipment
- We warrant repaired products for 3 months
- We can provide certificates of calibration and conformance with your repaired/serviced equipment
- Your equipment will be returned clean as well as repaired and serviced
- We can turn most repairs around in less than 5 business days
- We have a very efficient, well equipped service center conveniently located near Hwy 27 and Finch at 100 Westmore Drive Unit 23 in Toronto. Our voice over IP telephone system gives you a toll free number for you to reach us, no charge, at 1 800 672 4678
