Compact and Versatile

The V-TEC mini PFL is the most compact and lightweight self retracting lanyard ever developed using radial energy-absorbing technology. The compact design eliminated the need for an exposed external energy-absorber outside of the housing, which improves wear and tear performance and decreases the replacement cycle, saving you money. The product offers fall arrest and restraint for users 60 to 140 kg including tools.

Strong and Tested

The V-TEC mini PFL has a highly durable polycarbonate, clear casing, allowing for easy pre-use inspection of critical internal components. Unit can withstand temperatures ranging from -40° to + 54°C. The V-TEC Mini PFL has been tested to these relevant standards:

- AS/NZS 1891.3
- EN 360:2002
- ANSI Z359.14, Class B
- OSHA 1910.66
- OSHA 1926.502
- CSA Z259.2.2-98
