

The MSA WORKMAN[®] Utility Harness offers an all purpose full body harness suitable for a wide variety of applications including confined space, roof work, maintenance, elevated work platforms, tower work, general construction and more. The WORKMAN[®] Utility Harness is light weight, easy to don and includes added comfort features, making it a suitable choice for all day wear.

The self contained tag pack and integrated load indicator make harness inspections simple. Couple with our WORKMAN[®] Spreader Bar for vertical positioning into and out of a confined space. Also compatible with MSA's Pole Straps for work positioning applications. Certified to AS/NZS 1891.1:2007.

Applications

- Construction
- Maintenance
- Mining
- Ladder Work
- Descent and Rescue
- Scaffolding
- Confined Space
