

2015 BUMPER BAR PRODUCT SAFETY ADVISORY

For 2015 VISTA stroller, 2015 CRUZ stroller, and 2015 RumbleSeat purchased from December 2014 through June 2015.

Our top priority at UPPAbaby is the safety of children. We conduct extensive testing to ensure UPPAbaby products meet all global industry and regulatory standards.

Despite extensive testing and passing of all global industry and regulatory testing, UPPAbaby received reports of children biting down and tearing off a piece of the new 2015 stroller bumper bar. There have been no injuries reported.

However, since UPPAbaby considers this to be a safety hazard, the company is issuing a Safety Advisory on the bumper bar on the 2015 VISTA stroller, 2015 CRUZ stroller, and 2015 RumbleSeat.

We are addressing this issue by reintroducing a bumper bar cover, which zips over the bumper bar.

UPPAbaby is instructing consumers to immediately remove and stop using the bumper bar on the 2015 VISTA stroller, 2015 CRUZ stroller, and 2015 RumbleSeat purchased from December 2014 through June 2015. Consumers who registered their products will automatically receive free bumper bar covers in the mail, which will remedy the issue. If consumers did not register their products, they should visit the link below to register for a free bumper bar cover. Once the bumper bar cover is received and put onto the bumper bar, consumers can resume use of the bumper bar.

This is not a recall. Recalls can only be announced by government agencies. This is a proactive Product Safety Advisory initiative by UPPAbaby. If you have any questions, please contact UPPAbaby Customer Service at 844-540-8694 or visit uppababy.com/help-desk.
